

Anonymeter Accessibility Conformance Report

WCAG Edition. Based on VPAT® Version 2.5 (ITI). VPAT is a registered service mark of the Information Technology Industry Council.

Name of product / version	Anonymeter (anonymeter.com), web application, release of 23 October 2026
Report date	23 October 2026
Product description	Hosted service for anonymous feedback forms and suggestion boxes. Respondents answer through a link or QR code in a web browser, without an account.
Contact information	Avi Hayev, Founder - support@anonymeter.com - Smartic Tech, 1 King Street West, Suite 201, Toronto, ON M5H 1A1, Canada
Scope of this report	The respondent-facing pages: the form page (anonymeter.com/f/...), the password prompt of a password-protected form, the thank-you page, and the anonymous follow-up page a respondent opens to read and answer a follow-up question. Not covered: the form owner's dashboard, form builder and settings pages, which have not yet been evaluated to the same depth.
Evaluation methods used	Self-evaluation by the vendor, October 2026. Keyboard-only operation in Google Chrome (Tab, Shift+Tab, arrow keys, Space, Enter) on light and dark themes; inspection of the accessibility tree (names, roles, states) in Chrome; computed colour-contrast checks of every visible text element and of control boundaries in both themes; reflow at 320 CSS px; WCAG 1.4.12 text-spacing override; source-code review of the form templates. Live measurements were taken on the form page; the password prompt, thank-you and follow-up pages share the same styles and were reviewed in the source. Automated regression tests guard the fixes. Testing with a physical screen reader (NVDA, JAWS, VoiceOver) by a third party has not yet been performed.
Applicable standards	Web Content Accessibility Guidelines 2.1, Level A and Level AA (which include WCAG 2.0 A and AA). Level AAA: not evaluated.

Terms

Supports: the functionality has at least one method that meets the criterion without known defects, or meets it with equivalent facilitation. **Partially Supports:** some functionality does not meet the criterion. **Does Not Support:** the majority of functionality does not meet the criterion. **Not Applicable:** the criterion is not relevant to the product.

Table 1: Success Criteria, Level A

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content	Supports	Decorative icons are hidden from assistive technology. Rating stars carry text alternatives ("3 stars"). An optional logo uploaded by a form owner is shown next to the form title, which carries the same information.
1.2.1 Audio-only and Video-only (Prerecorded)	Not Applicable	The pages present no prerecorded audio or video. (On whistleblowing channels a respondent may record their own voice report; that is user input, not presented media.)
1.2.2 Captions (Prerecorded)	Not Applicable	No prerecorded media.
1.2.3 Audio Description or Media Alternative (Prerecorded)	Not Applicable	No prerecorded media.
1.3.1 Info and Relationships	Supports	Each written-answer field is labelled by its question; rating and multiple-choice questions are radio groups named by their question and marked as required where they are; the page has one main landmark and a level-1 heading; errors are announced as alerts.
1.3.2 Meaningful Sequence	Supports	Reading and focus order follow the visual order.
1.3.3 Sensory Characteristics	Supports	Instructions do not rely on shape, position or sound.
1.4.1 Use of Color	Supports	A chosen star is drawn filled and an unchosen one as an outline; required questions are also announced programmatically; errors are given in text.
1.4.2 Audio Control	Not Applicable	Nothing plays automatically.
2.1.1 Keyboard	Supports	All questions, including the star rating (arrow keys within the group), the follow-up opt-in, the voice-report controls, the theme switch and Submit, work with the keyboard alone.
2.1.2 No Keyboard Trap	Supports	Focus can always move on with Tab / Shift+Tab.
2.1.4 Character Key Shortcuts	Not Applicable	No single-character shortcuts.
2.2.1 Timing Adjustable	Supports	There is no time limit for answering. If a page has been open for a very long time, the answers stay on the page and the respondent only needs to send again.
2.2.2 Pause, Stop, Hide	Not Applicable	No moving, blinking or auto-updating content (the voice-recording timer runs only while the respondent records).

2.3.1 Three Flashes or Below Threshold	Supports	No flashing content.
2.4.1 Bypass Blocks	Supports	Only two controls (logo link, theme switch) precede the form; the form is the page's main landmark.
2.4.2 Page Titled	Supports	The page title is the form's title followed by "Anonymeter".
2.4.3 Focus Order	Supports	Focus moves through the questions in order, then Submit.
2.4.4 Link Purpose (In Context)	Supports	Links are few and named by their text.
2.5.1 Pointer Gestures	Supports	No multipoint or path-based gestures.
2.5.2 Pointer Cancellation	Supports	Standard controls; actions fire on release.
2.5.3 Label in Name	Supports	Accessible names contain the visible labels.
2.5.4 Motion Actuation	Not Applicable	No motion-operated functions.
3.1.1 Language of Page	Supports	The page declares its language, which follows the respondent's language (18 languages).
3.2.1 On Focus	Supports	Focus causes no change of context.
3.2.2 On Input	Supports	Answering may reveal a follow-on question set by the form owner (conditional logic); this does not move focus or change context.
3.3.1 Error Identification	Supports	Missing required answers are identified in text, both by the browser before sending and by the server list after, which is announced as an alert. A wrong form password is announced.
3.3.2 Labels or Instructions	Supports	Every question is a visible label; required questions are marked and announced.
4.1.1 Parsing	Supports	No duplicate IDs; standard markup. (Obsolete in WCAG 2.2.)
4.1.2 Name, Role, Value	Supports	Native controls, radio groups with names, the "Check for a reply" disclosure exposes its expanded state.

Table 2: Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live)	Not Applicable	No live media.
1.2.5 Audio Description (Prerecorded)	Not Applicable	No prerecorded media.

1.3.4 Orientation	Supports	Works in portrait and landscape.
1.3.5 Identify Input Purpose	Not Applicable	The service does not ask respondents for personal information; questions are written by the form owner and are free-form.
1.4.3 Contrast (Minimum)	Supports	All text measured at 4.5:1 or above (3:1 for large text) in the light and the dark theme. A Pro form's custom brand colour automatically gets white or near-black button text, whichever contrasts more.
1.4.4 Resize Text	Supports	Text resizes to 200% without loss of content.
1.4.5 Images of Text	Supports	No images of text, other than an optional owner logo.
1.4.10 Reflow	Supports	No horizontal scrolling at 320 CSS px.
1.4.11 Non-text Contrast	Supports	Text-field borders, radio buttons, checkboxes, star outlines and focus rings reach 3:1 in both themes.
1.4.12 Text Spacing	Supports	No loss of content with the WCAG text-spacing overrides applied.
1.4.13 Content on Hover or Focus	Supports	No custom hover or focus pop-ups.
2.4.5 Multiple Ways	Not Applicable	Each form is a single page reached by its own link, a step in a process.
2.4.6 Headings and Labels	Supports	The heading is the form title; labels are the questions.
2.4.7 Focus Visible	Supports	Every control shows a 2px focus ring, with a colour chosen for each theme.
3.1.2 Language of Parts	Partially Supports	The interface follows the respondent's language, but the questions are written by the form owner in their own language, which is not marked up separately. A screen reader may therefore read questions in another language with the interface language's voice.
3.2.3 Consistent Navigation	Supports	The same header and footer on every respondent page.
3.2.4 Consistent Identification	Supports	Controls with the same function are named the same way.
3.3.3 Error Suggestion	Supports	Error messages name the question that needs an answer.
3.3.4 Error Prevention (Legal, Financial, Data)	Not Applicable	Submitting a form creates no legal or financial commitment.
4.1.3 Status Messages	Supports	Sending, send failures, the Anonymity Guard warning and the "Check for a reply" error are exposed as status or alert messages.

Legal disclaimer

This report is a self-evaluation by the vendor and reflects the respondent-facing pages as of the report date. It is provided for information and does not constitute a warranty. Accessibility problems can be reported to support@anonymeter.com; problems on the response form are fixed before other work. See also anonymeter.com/accessibility.
